

Gain Stability and Success

Evora SAP Work Manager Health Check

Get Your System Performing Efficiently

Does your server crash regularly or require frequent restarts? Is your sync painfully slow? Does it time out? Are your users frustrated? Do they get lost navigating or miss data entry fields? There is a big difference between a solution that technically works and a solution that actually meets the needs of the business.

Evora's hands-on team can perform a SAP Work Manager assessment in just an hour, providing insights based on experience and a clear roadmap to get your system performing efficiently so you get the best possible ROI.

How Evora Has Helped

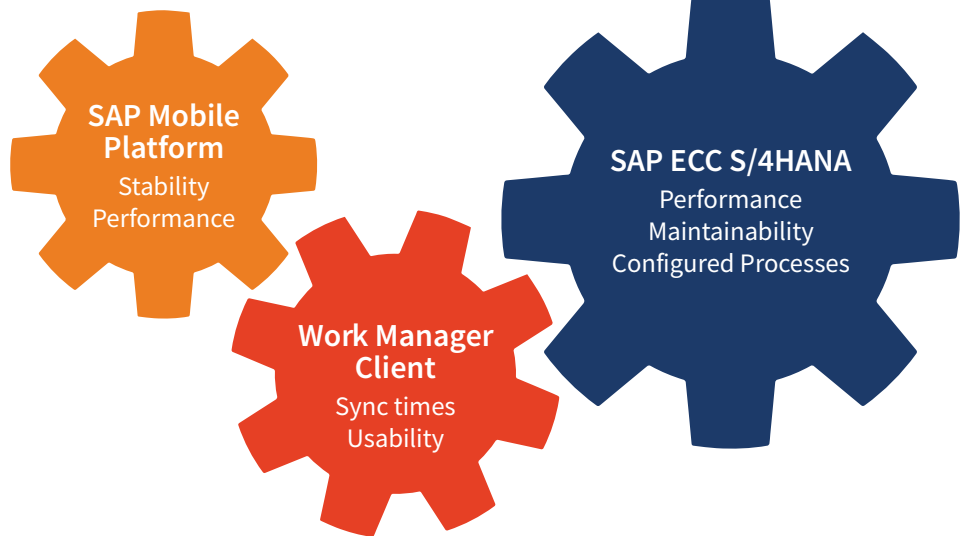

An oil and gas company resolved synchronization issues and improved screen flow, increasing user adoption and data quality.

A US university solved server crashes and client sync issues, as well as increased user satisfaction by improving client usability.

After a health check and usability improvements, a global chemical company rolled out their Work Manager to all subsidiaries in over 25 countries.

Component Review

1

Free assessment to identify areas for improvement, including review of server and client components, as well as processes and functionality for overall user experience

2

Prioritize resolution recommendations

3

Refine processes & user experience within the app
