

Exchange Data & Collaborate

Evora SAP IAM Asset Intelligence Network

About Asset Intelligence Network

SAP Intelligent Asset Management (IAM) Asset Intelligence Network (AIN) is a business network for Asset Operators, OEMs, suppliers, and service providers to collaborate and exchange asset information.

Evora integrates AIN as an end-to-end business process using your existing S/4HANA or SAP ERP environment. This enables the creation and synchronization of maintenance assets, health indicators, and real-time performance data to determine a strategy's effectiveness.

The Evora Advantage

Improve asset data quality and transparency across manufacturers, suppliers, operators, etc.

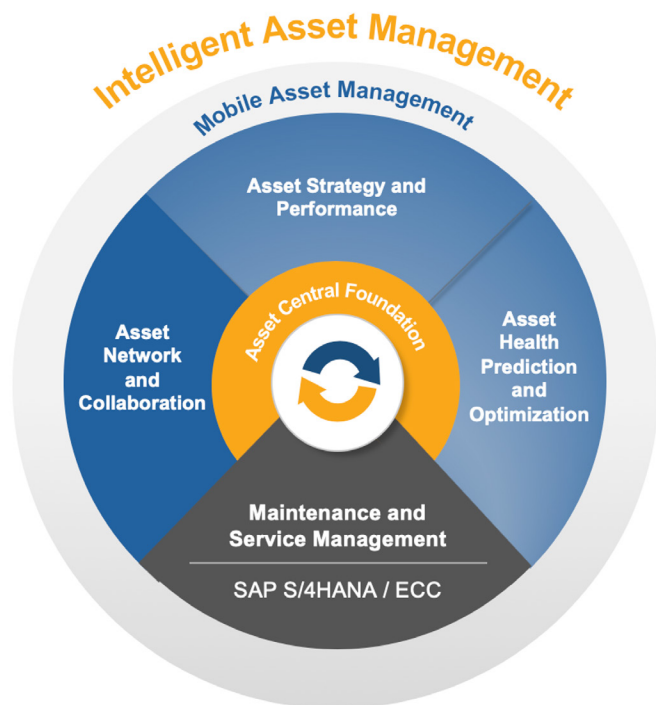

Improve asset reliability and employee productivity.

Leverage and create new business models by trading asset content within your business network.

AIN Setup & Configuration

- Backend integration with SAP ERP or S/4HANA
- Configuration of Asset Central Foundation & SAP Business Technology Platform cockpit for AIN needs, as well as synchronization of equipment records
- Configuration of user roles and authorizations
- Definition of templates and asset structure
- Invitations to business partners
- Quality Assurance
- Coaching & support
