

Enhance Your Asset Strategy

Evora SAP IAM ASPM

About Asset Strategy and Performance Management

SAP Asset Strategy and Performance Management (ASPM) is a Software-as-a-Service application that provides tools and proven methodologies to efficiently plan and develop the optimal maintenance strategy for your assets in order to increase overall asset performance and reduce maintenance costs. Evora will conduct a risk and criticality assessment and perform an RCM or FMEA, using ASPM to focus on a checklist of preventative and predictive tasks that can be implemented in your maintenance management system.

The Evora Advantage

Improve asset reliability by using proven methodologies.

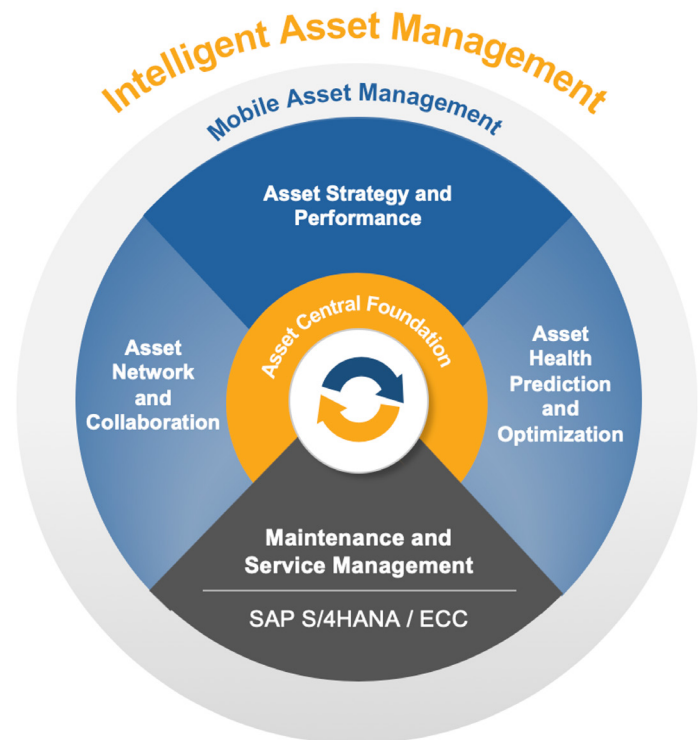

Reduce costs by avoiding over-maintaining assets.

Reduce paper- or Excel-based work by using an asset management system.

ASPM Setup, Exploration & Realization

- Risk and Criticality assessment walk-through and knowledge transfer
- FMEA (Failure Mode & Effect Analysis), RCM (Reliability-Centered Maintenance), and Checklist assessments
- Fit/gap analysis and defining key processes for asset management
- ASPM configuration
- Backend integration with SAP ERP or S/4HANA
- Implementation with selected equipment
