

Improve Safety, Optimize Productivity

Evora Facilities Management Solutions

The Future of Facilities Management

Often, facility teams struggle with siloed teams, manual processes, managing assets, slow response times, scheduling and dispatching techs (including third-party contractors), etc.

With ServiceNow's Facilities Management, Evora ensures that the facilities of the environment are in harmony with the people who occupy them, keeping them safe and comfortable. By planning for emergencies and business continuity, Evora helps to maintain operations, continually gather and analyze information and avoid downtime. Our team of experts operate tactically to optimize productivity.

Evora's team will analyze business processes to calculate cost and ROI and deliver a roadmap detailing how software improves efficiencies and visibility for overall facility operations. Innovation through software reduces manual, paper-based tracking and transforms them through automation. Furthermore, technician experience is enhanced through mobile capabilities enabling greater productivity.
