

# Deliver Service Excellence

## Evora & SAP Field Service Management

### Take Field Service out of the Silo

With SAP Field Service Management (FSM), Evora harmonizes field service scheduling and execution across the many touchpoints along the field service journey, ensuring the safety of both customers and workers as well as integrating processes across the front and back office.

This solution allows the elimination of silos, provides automation of workflows and increases the streamlining of processes - not just within field service but across the whole organization.

Reduce costs and increase margins by adding real-time, AI-powered, automated scheduling and route optimization to minimize travel time of technicians and decrease truck rolls by grouping relevant work. This FSM solution will decrease efforts for customers and business units that interact with the delivery of safe and reliable field service efforts.

### Realize Value With Field Service

End-to-End Solution Harmonization

Boost First-Time Fix Rate

Centralize Workforce Management

Expand Resource Pool

Reduce Environmental Impact

Future Proof Service Delivery

### Capabilities That Scale With Your Business

#### Basic Features
