Mobility for Work and Asset Management

Unlocking Mobile Workforce Efficiency: Empower technicians with SAP's latest solution, Service and Asset Manager, for seamless work order execution on mobile devices. Enhance usability and synchronization speeds, ensuring increased user satisfaction and adoption. Stay up-to-date with the latest Work Manager 6.6 version to benefit from SAP mainstream maintenance coverage. Prepare for smooth SSAM migrations, optimizing your work and asset management capabilities.

Planning and Scheduling

Streamlined Work Planning and Scheduling: Leverage SAP's advanced solutions, such as Field Service Management or Resource Scheduling, for efficient scheduling, planning and dispatching of work. Optimize capacity management, route planning and automate scheduling for seamless operations. With EvoPlan, part of our EvoSuite, easily manage work order planning and assignment. Empower planners, schedulers and supervisors with a user-friendly interface to assign and view work for maintenance or service technicians.

Plant Maintenance and Asset Management

Transformative Solutions for Maintenance Excellence: Modernize your maintenance operations with our industry-best practices. Enhance and optimize existing SAP PM deployments or start the S/4HANA to unlock additional value. Increase accessibility and usability through the deployment and creation of Fiori apps. Experience streamlined work processes and improved user experience with EvoSuite our SAP-certified suite of apps. Built on SAP UI5/Fiori, our apps seamlessly integrate with ECC and S/4HANA for efficient execution of maintenance and service work.

Why Choose Us?

We build on our experience and an expert team of consultants including best-in-class designers and development architects. The wisdom and knowledge of Evora employees in implementing complex workforce management solutions is what sets us apart.
